

Page 36 - The Librarian

Translation

Many have sought the secrets of this world, drawn by the [great power](#) and other secret legends.

THE LIBRARIAN has learned much, including powerful sorcery. He makes his home high above the clouds, waiting for foolish Ruin Seekers to bring him more pages.

Although powerful, his tragedy is his belief that the HOLY CROSS resides in the CATHEDRAL.

He will never visit [The Far Shore](#).

Elaboration

The artwork of The Librarian on this page also shows up on page 23, in the hexagon for MP. This indicates the Hero's Grave for MP is in the Great Library.

The description for the associated Steam community item, "The Librarian," is "Oh hello! Can you help me find the book I'm looking for?"^[1]
